JOB DESCRIPTION

JOB TITLE: Project Engineer

DEPARTMENT: Engineering

QUALIFICATIONS:

- ◆ Bachelor's degree and EIT certificate required
- ◆ Experience with AutoCAD and land development design preferred
- ◆ Must have strong oral and written communication skills

ESSENTIAL DUTIES:

- ◆ Ascertain project objectives, time frames, budget and procedures
- ◆ Work with Project Manager and design staff to coordinate design aspects of projects pertaining to wastewater, storm water, paving, hydraulics, grading, utility design, drainage and water treatment.
- ◆ Review, research and interpret regulatory codes and ordinances
- ◆ Prepare improvement plans, specs, cost estimates, permits and other supporting design documents for both public and private projects.
- ◆ Assist with analysis of report, maps, drawings and tests as they relate to the planning and execution of project design.
- ◆ Utilize design software to prepare engineering design documents.
